

# ASA Deep Dive

# Routing Protocols

# Configuring Static Routes on ASA

- ▶ Configuring Static Routes on the firewall is somewhat similar to configuring static routes on a Cisco Router, with a few changes though.
- ▶ Routers would be configured using the command **ip route**

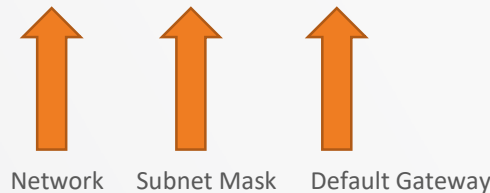

- Example 1

- ip route 10.0.0.0 255.255.255.0 10.0.0.50

- Example 2

- ip route 0.0.0.0 0.0.0.0 10.0.0.50

# Configuring Static Routes on ASA

▶ ASA would be configured using the command **route {nameif}**

- Example 1

- route inside 10.0.0.0 255.255.255.0 10.0.0.50

Network

Subnet Mask.

Default Gateway

- Example 2

- route outside 0.0.0.0 0.0.0.0 10.0.0.50

Network.

Subnet Mask

Default Gateway
